

IN THE SPECIFICATION

Page 1, after the title, please insert -- This application is a continuation of
application serial No. 08/893,878 filed July 11, 1997, now U.S. Patent No. 5,909,212 --

IN THE CLAIMS

Please amend claims 1 and 4 by rewriting the same as follows:

22 Sub D
--1. (Twice Amended) An apparatus for controlling display of an electrical
program guide, comprising:

broadcast program information storage means for storing, as broadcast
information, the information relative to a number of broadcast programs extracted from
predetermined positions of video signals;

recorded program information storage means for storing, as recorded program
information, the information relative to [the] a number of broadcast programs previously
recorded in a recording [media] medium; and

display control means capable of displaying simultaneously, as an electrical
program guide to provide the program-related information, the program information relative to
both of the broadcast programs and the recorded programs on the basis of the broadcast program
information stored in said broadcast program information storage means and also the recorded
program information stored in said recorded program information storage means whereby both
broadcast program information and recorded program information are processable by a single
electrical program guide function so as to enable a user to select for more than one program the
broadcast information and recorded program information associated therewith by activating the
desired single electrical program guide function only once.--

Sub 2
D
OO

--4. (Twice Amended) A method of controlling display of an electrical program guide comprising the steps of:

storing, as broadcast program information, the information relative to a number of broadcast programs extracted from predetermined positions of video signals;

storing, as recorded program information, the information relative to [the] a number of broadcast programs previously recorded in a recording [media] medium; and

displaying simultaneously, as an electrical program guide to provide the program-related information, the program information relative to both of the broadcast programs and the recorded programs on the basis of the stored broadcast program information and also the stored recorded program information whereby both broadcast program information and recorded program information are processable by a single electrical program guide function so as to enable a user to select for more than one program the broadcast information and recorded program information associated therewith by activating the desired single electrical program guide function only once.--

REMARKS

It is submitted that these claims, as originally presented, are patentably distinct over the prior art cited by the Examiner, and that these claims were in full compliance with the requirements of 35 U.S.C. §112. Changes to these claims, as presented herein, are not made for the purpose of patentability within the meaning of 35 U.S.C. §101, §102, §103 or §112. Rather, these changes are made simply for clarification and to round out the scope of protection to which Applicants are entitled.
